**Subject:** Ohio Valley Coal slurry release

Dave Barch from Ohio Valley just called and confirmed they did have a slurry release to Perkins Run. It happened sometime over the night and they believe it was due to slurry shifting in the impoundment. They have stopped the discharge from the slurry pond. Although everyone is aware of the situation, I asked Dave to call the spill response and follow-up with a written report. I tried to call Abbot to get assessment from the highway patrol plane, but she didn't answer.
